Office Action Summary

Art Unit: 2824

Note the drafting criticisms.

The abstract should be in a single paragraph.

Claims 1-25 are objected to for being unclear in claim 1 as to the several "voltage pulse" recitations of lines 4-6.

The "said multiple voltage pulse" appears to refer to the "multiple step voltage pulse" but does not have a clear antecedent basis.

Claim 2 is unclear in calling for first and second time intervals which are substantially coincidental. Wouldn't this be considered the same interval?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-15 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Sung et al or Hara.

The references show memory erase systems using the pulses described by applicants claims. No clearly defined method steps are seen which define over these references.
